Expertise

- MERN stack development (MongoDB, Express.js, React, Node.js).
- Proficient in JavaScript,Typescript, HTML, CSS.Tailwind,EJS,
- React.js for interactive, responsive UIs.
- State management: Redux, Context API.Redux toolkit
- Git and GitHub for version control.
- Authentication/authorization: JWT, OAuth.
- Deployment: AWS,EC2,Route53
- Responsive web design.
- RESTful, APIs.
- Ajax, json,Postman
- MongoDB, Mongoose, SQL
- Figma

Soft Skills

- Communication and collaboration skills
- Applied strong problem-solving and critical thinking skills to address complex challenges, resulting in innovative solutions and improved outcomes.
- Adaptability and Learning
- Leadership and Mentoring
- Efficiently coordinated tasks and deadlines, resulting in improved workflow and on-time project delivery
- Stress Management

Education

BSc in **Computer Science**
Kannur University
2017 - 2020

Language

English

Malayalam

SIDHARTH TP
MERN stack developer

Experienced MERN stack developer with a strong track record in crafting efficient web applications. Seeking a challenging role to apply technical expertise and creativity to drive success in cutting-edge projects.

Projects

E-commerce Website

- Developed a full-stack ecommerce website using technologies such as JavaScript, Node.js, Express, Mongoose, HTML, and CSS.
- Implemented user authentication and authorization functionalities for secure access.
- Integrated a secure payment gateway (RAZORPAY) for online transactions.
- Integrated TWILIO for OTP verification to enhance security and user verification.

  (**github**)

Ongoing project

- Designed and developeing a comprehensive website that fosters a connection between construction workers and users, offering a platform for worker registration, job searches, and access to construction designs, ultimately helping users discover the perfect worker they are seeking.

  (**github**)

Mini-Projects

User Management Website (Github)
- Engineered a user management website using React for the front-end and Node.js/Express for the back-end, enabling efficient user administration for admins.
- Integrated user authentication and role-based access control, enhancing security and data privacy.
- Utilized MongoDB to optimize user data storage and management.
  (**Github**)

User-Friendly Todo List Application
- Developed a user-friendly Todo list application using React, incorporating efficient state management to ensure a seamless and organized task-tracking experience.
  Github)

Netflix and OLX Clone using React
- Created a clone of Netflix and OLX using React, replicating the core functionalities and user interfaces of these platforms.
- Integrated IMDB data to enhance the content and provide a richer user experience.
- (**Github**)

Chat Application using Socket.io
- Developed a real-time chat application using Socket.io, enabling seamless communication between users in real-time.
- (**Github**)

Experience

- Brocamp- Coding Bootcamp
- Developed Ecommerce website and some mini projects
- Weekly reviews by industrial experts
- November 2022 - Present
- I have experience working with both MVC and Clean Architecture in various projects
